Dataset title	Latin America and the Caribbean Standardized Public Debt Database, Data as of December 2023
Acronym	Standardized Public Debt Database
Description	This database compiles currrent standardized statistics on sovereign debt issuances for the Latin American and Caribbean (LAC) region and contains biannual data starting in 2006 through December 2023. Sovereign debt data is classified by legislation, creditor, currency, and maturity, among other areas, for 26 LAC countries. The availability of valid, comparable, and standardized public debt data is essential for the implementation of sound policies. As such, at the core of the LAC Debt Group initiative is the development of a standardized sovereign debt database to help debt managers, policymakers, and other actors of financial markets analyze the evolution and composition of public debt in the region and conduct crosscountry comparisons. The data are provided by LAC public debt offices in response to a questionnaire specifically designed to allow comparability of data. The questionnaire, whose response is non-compulsory, is intended to compile current standardized statistics for objective and homogeneous definitions of public debt.
