## Introduction

The Barbados Survey of Living Conditions (BSLC) 2016 is a joint effort of the Barbados Statistical Service (BSS) and the Inter-American Development Bank (IDB) that intends to generate a comprehensive dataset on the most important dimensions of welfare in Barbados, to support policy dialog in all major areas of government action – education, health, housing and farming in particular – with an emphasis on the enhancement of social safety nets for poverty alleviation. The survey also collected information on the consumption patterns, incomes and expenditures of the Barbadian households, intended to update the Consumption Price Index basket and inform the System of National Accounts.

The BSLC 2016 visited a representative probability sample of around 2,500 households over a 12-month period – from February 2016 till January 2017. It was fielded by a team of 12 interviewers and 3 supervisors headed by a Project Manager based at BSS headquarters, with technical support from Sistemas Integrales.

This report describes the main methodological aspects of the survey – the design of the sample, the contents of the questionnaire, and the organization and quality assurance of fieldwork – and presents the content and organization of the generated databases to support the various forthcoming analytical endeavors.

## Sample design

The BSLC target population includes all persons who reside in households and, following the conventional practice for population surveys, it excludes institutionalized persons (prisons, nursing homes, long-term or dependent care facilities). According to the 2010 Population and Housing Census, Barbados had a household population of 225,000 persons living in 78,600 households.

**Figure 1: Barbados parishes**

The BSLC 2016 is based on a stratified two-stage area probability sample which spreads over 12 consecutive months and includes 2,508 households distributed across 11 strata corresponding to the 11 parishes.

The first-stage sample is formed by 288 Primary Sampling Units (PSUs) which are Census Enumeration Districts (EDs). The sample was initially allocated into the 11 strata according to Kish's rule<sup>1</sup>, and later slightly adjusted to align with the analytic domains used by previous surveys in Barbados. Using the 2010 Census as a sample frame, PSUs were then systematically selected within each stratum with probability proportional to their size, using the number of households reported by the Census as measure of size.<sup>2</sup>

The Secondary Sampling units (SSUs) are the households located in each of the PSUs selected in the first stage. All the households in every selected PSU were listed on the fortnight immediately prior to

<sup>1</sup> Kish's rule allocates the sample in proportion to the factors  $[W_h^{-2} + H^{-2}]^{0.5}$ , where  $H$  is the number of strata (11 in this case) and  $W_h$  ( $1 \leq h \leq H$ ) is the fraction of households in stratum  $h$ . It is generally considered a good compromise between a proportional allocation (which would deliver nearly optimal estimates for the country as a whole) and an equal allocation (which would deliver estimates of comparable quality in each of the strata). However, it is important to highlight that the BSLC sample size and design do not permit to obtain precise estimates at the stratum/parish level.

<sup>2</sup> The 45 EDs that the BSS was regularly surveying in the Barbados Labor Force Survey were excluded from the frame.

the interviews, and those engaged in farming activities were flagged. Ten households were thereafter drawn systematically with equal probabilities, with a stratification into farmers and non-farmers<sup>3</sup>.

Since one of the main objectives of the survey is to measure the consumption and expenditure patterns of the Barbados population, the sample was evenly distributed along a twelve-month period, from February 2016 through January 2017. The overall yearly sample was allocated into 12 monthly replicates, which means that the overall sample is achieved through the aggregation of 12 smaller samples that spread across the entire country and that are nationally representative by themselves. Thus, the BSLC will capture consumption, expenditure and income seasonality, achieving not only spatial but also time representativeness.

Base weights were computed in order to account for the unequal inclusion probabilities and were later adjusted for nonresponse<sup>4</sup> to generate the final weights included in the BSLC data sets. In order to estimate the response propensity used in the nonresponse adjustment, groups of 3 EDs were constructed on the basis of their spatial contiguity, according to the GPS coordinates collected for the interviewed households.

## Estimation and sampling error

When estimating sampling errors and confidence intervals for statistics such as means, proportions, ratios and linear and logistic regression parameters, all BSLC complex sample design features (stratification, clustering and weighting due to unequal inclusion probabilities and nonresponse adjustments) need to be accounted for. Standard software analysis methods assume simple random sampling (SRS) or equivalently independence of observations when computing sampling errors for sample estimates. Generally, the SRS assumption, i.e. the omission of complex sample design features in the data analysis, result in biased estimates and lower sampling variances of the estimators. Hence, sampling errors will be understated, confidence intervals will be narrower and test statistics will be biased.

The two most usual approaches to estimating sampling errors for complex sample data are through 1) the Taylor Series Linearization (TSL) of the estimator and the corresponding approximation to its variance, or through 2) the use of resampling variance estimation techniques such as balanced repeated Replication (BRR), jackknife repeated replication (JRR) and bootstrap. STATA and other statistical software packages use the TSL method as the default for estimating sampling errors (expressed in the sampling variances, standard errors, coefficients of variation and confidence intervals) for complex sample data. *Appendix 4* indicates the STATA syntax that should be used when analyzing BSLC data to account for its sample design features and weighting.

The table below presents the estimates, standard errors, 95% confidence intervals and coefficients of variation for a set of BSLC selected indicators at the household and individual levels.

---

<sup>3</sup> Farmer households were oversampled: up to two of the 10 households in each PSU were selected from among the farmers, and the rest from among the non-farmers. This was done in response to the special interest of the government on farming, since farmers are a minority in Barbados and a non-stratified sample would have contained too few of them.

<sup>4</sup> Total nonresponse rate was 20.7%, which is lower than the average for similar surveys of living conditions and household budget in Latin America and the Caribbean.

**Figure 2: Estimates and sampling errors for selected indicators**

Indicator	Estimate	Standard error	95% confidence interval	Coefficient of variation (%)
<b>Mean</b>				
Monthly food household expenditure	657.8	12.52	(633.1 , 682.4)	1.9
Monthly non-food household expenditure	1538.0	51.96	(1435.7 , 1640.3)	3.4
Monthly net income from the main job - Employees	2199.2	49.59	(2101.6 , 2296.9)	2.3
<b>Proportion</b>				
Households living in a private rented dwelling	0.1680	0.0090	(0.1511 , 0.1864)	5.4
Individuals with at least one medical checkup per year	0.7467	0.0087	(0.7293 , 0.7634)	1.2
Individuals with Work as main activity in the past 30 days	0.5542	0.0084	(0.5377 , 0.5706)	1.5
Barbados-born individuals who ever lived abroad for 6 months or longer	0.1383	0.0066	(0.1258 , 0.1518)	4.8

## Survey tools and methods

The core objective of the BSLC is to report the living conditions of the Barbados population, with a focus on consumption and expenditures. The survey also captures information about personal income (through wage earning, self-employment or farming) and includes modules on immigration, health, education, government social safety net programs, early childhood development, crime, employment, housing and emigration.

### Questionnaire

The BSLC 2016 questionnaire is divided into 15 modules, some of which are further subdivided into *parts* as follows:

- Module 0: Cover page
- Module 1: Basic Demographics of household members
- Module 2: Migration
- Module 3: Education
- Module 4: Government social safety net programs
- Module 5: Health
- Module 6: Pregnancy health care and Fertility
- Module 7: Children<sup>5</sup>
  - *Part A: Childcare, early development, etc.*
  - *Part B: Anthropometrics*
- Module 8: Crime and personal safety
- Module 9: Employment
- Module 10: Financial inclusion

<sup>5</sup> Part 7A was recorded directly by the interviewers on the questionnaire. Part 7B was completed by the survey supervisors, who re-visited the households shortly thereafter to measure and weigh children with standard UNICEF tools and methods.

- Module 11: Personal expenses in the past 7 days
- Module 12: Farming
  - *Part A: Landholding*
  - *Part B: Crops*
  - *Part C: Livestock and poultry*
  - *Part D: By-products*
  - *Part E: Fishing*
  - *Part F: Expenses on agricultural inputs*
  - *Part G: Agricultural assets*
- Module 13: Housing
- Module 14: Household consumption and expenses
  - *Part A: Consumption of food and beverages in the past 7 days*
  - *Part B: Non-food expenses in the past 30 days*
  - *Part C: Expenses on clothing and footwear in the past 3 months*
  - *Part D: Non-food expenses in the past 12 months*
- Module 15: Emigration

The BSLC 2016 questionnaire is reproduced in full in *Appendix 1*.

### **Database**

The BSLC 2016 database is organized into 11 files, depending on the nature of the statistical units observed. With few exceptions, all of the data recorded in a specific questionnaire part is stored in one of these files, as shown below:

<b>File</b>	<b>Statistical unit</b>	<b>Questionnaire Modules and Parts</b>
RT001	Household	Cover, 12A, 13
RT002	Individual (present household member)	2, 3, 4, 5, 6, 7A, 7B, 8, 9, 10
RT003	Former household member	15
RT011	Personal expense item	11
RT121	Crop	12B
RT122	Animal species	12C
RT123	Agricultural by-product	12D
RT124	Fish species	12E
RT125	Agricultural input	12F
RT126	Agricultural asset	12G
RT140	Food item	14A
RT141	Non-food item	14B, 14C, 14D

The BSLC 2016 codebook, with the list and characteristics of all variables in the database is included as *Appendix 2*.

### **Public use database – Anonymization**

Each of the BSLC data files exists in two versions: a “Full” version, that contains all of the variables reported on the questionnaire, as well as the weights and sample design variables required for the analyses; and a “Public” version, from which certain variables (such as the respondent names, addresses, phone numbers and precise geocodes) have been excluded to guarantee statistical confidentiality.

### ***The BSLC approach to household consumption***

Household consumption is reported in Modules 11 and 14. Module 11 asks individual members about their personal expenses out of the home (e.g. snacks in a bar, bus tickets, etc.), whereas Module 14 asks designated respondents about the consumption of the household as a whole (e.g. on meals at home, electricity, purchase of furniture, etc.)

Module 14 is divided into three parts. Part 14A reports food consumption and parts 14B, 14C and 14D report non-food expenditures over the past 30 days, the past 3 months and the past 12 months.

The food consumption module first identifies the food items that were actually consumed (i.e. eaten or drank) at home during the past 7 days. Then, depending on whether the item is ever purchased or not:

- For the items that are purchased, the frequency with which the household buys it is reported, as well as the quantity bought and the amount spent in the last purchase.
- For the items that are never purchased, the sources of acquisition (e.g. self-production, gifts, etc.) and the weekly quantity consumed are reported.

This questioning scheme differs from the one generally used by other surveys for the reporting of food consumption by recall, because the BSLC anchors the estimation of expenditures to a factual event – the last purchase – rather than to the loosely defined notion of “consumption in a given reference period” (typically the past week) as other surveys do. This approach proved to be quite successful in practice, but the estimation of yearly expenditures requires some care, because the annualization coefficient is specific of each item.

Food transactions are recorded in the database file RT140, with quantities converted into metric units (grams or milliliters). To facilitate the analysis, the records also contain the auxiliary variable `anncoeff`, with the annualization coefficient needed to bring the quantity (and, for purchases, also the amount spent) to a common annual estimate.

Non-food transactions from parts 14B, 14C and 14D are all recorded in the database file RT141, also with the annualization coefficient `anncoeff`.

Education expenses and most of health expenses are specifically addressed in Modules 3 and 5 respectively (at the individual level) and recorded in file RT002.

### ***The BSLC approach to the coding of schools, activities and occupations***

The vast majority of the categorical questions in the BSLC questionnaire are pre-coded. The only exceptions are the codes of primary and secondary schools in Module 3 (Education), and the codes of activities and occupations in both Module 9 (Employment) and Module 15 (Migration).

The coding of industrial activities and occupations is generally considered a very specialized task that requires years of experience and cannot be entrusted to survey fieldworkers. In fact, the ILO 4-digit standard classifications of industry (ISIC) and occupation (ISCO) have hundreds of categories, and their interpretation is far from trivial. For this reason, statistical agencies generally ask the interviewers to simply write down detailed descriptions in the questionnaire, to have a professional coder provide the codes in the office at a later stage. Unfortunately, this can have an impact on the opportune availability of the survey data.

The BSLC interviewers were asked to write down detailed descriptions on the questionnaire, as interviewers in other surveys do; and to enter the descriptions themselves in their own computers, to make them available to both coders and analysts immediately<sup>6</sup> in the survey datasets. They were also asked to make an effort to actually provide a code, if they could find it in the ISIC and ISCO tables included in the BSLC data entry program, with the help of a built-in phonetic search engine.

The same approach was adopted for the coding of primary and secondary schools. The BSLC datasets thus already contain preliminary versions of these codes, along with the detailed textual descriptions needed to generate enhanced versions in the future. The corresponding variables can be found next to each other in the datasets. The codes themselves are reproduced in *Appendix 3*.

## Fieldwork organization

The survey was fielded by one manager, three supervisors, one expeditor and 12 interviewers. Each interviewer was responsible for visiting 24 EDs with 10 sample households each, over the 12-month period of data collection. Having the interviewers' territories overlap – a technique known as *interpenetrating sampling* – facilitated fieldwork management and quality assurance (see the *Quality Assurance* section below). Each interviewer spent one fortnight<sup>7</sup> in each of the assigned EDs, listing households and conducting interviews.

**Listing.** The household listing of an ED was completed by the interviewer during the first 2 to 4 days of the fortnight allocated to each ED. The survey manager was then in charge of selecting the households to be interviewed by means of a sample selection program. The remaining days in the ED were used to interview the selected households.

**Interviewing.** A key feature of BSLC's fieldwork is that households had to be visited on several occasions, which responds to three different reasons:

- the questionnaire is very comprehensive and includes a large number of modules and questions, which makes it unlikely to be applied in one single sitting without seriously affecting data quality;
- given the specificity of some of the individual survey topics, no proxy answers were permitted, i.e. each member was asked to answer personally the questions related to his/her individual status. Children (defined as persons below 15 years of age) were an exception and an adult in charge was asked to respond on his/her behalf;
- not every topic related to the household may be known to the same extent and with the same accuracy by every household member. Hence, some members may be more suitable to answer about certain topics than others. For instance, the spouse may be a very appropriate respondent about food consumption, but the head of household may be fitter to respond about non-food expenditures and about emigrated former household members.

As a result, interviewers usually had to make separate appointments with different household members on different days and times in order to collect all the information required in the questionnaire.

**Supervisors.** Each supervisor was in charge of overseeing the interviewers in his team and of performing the anthropometric measurement of children of 5 years of age and younger. Usually,

---

<sup>6</sup> And also, more reliably, since they won't need to interpret the interviewers' handwriting.

<sup>7</sup> Each month was divided into two fortnights. The first fortnight went from the 1<sup>st</sup> to the 15<sup>th</sup> and the second from the 16<sup>th</sup> to the last day of the month.

supervisors' allocation is fixed, with one supervisor assigned to a particular interviewer across the whole survey. In the case of Barbados this allocation shifted over time, which helped to ensure fieldwork quality. This was possible thanks to the reduced dimensions of Barbados territory.

**Expeditor.** This person was responsible for contacting all selected households for the first time, and get their consent to participate in the survey. The expeditor was also in charge of making an appointment for the interviewer's first visit.

## Data management and Quality Assurance

BSLC data went through a quality assurance process built on three successive and linked stages: integration of computer quality controls to fieldwork, central monitoring of fieldwork quality indicators and direct fieldwork supervision.

### *Integration of computer quality controls to fieldwork*

Integration of computer-based quality controls to fieldwork has proven to be key to the success of complex surveys for over 30 years. In the BSLC this did not imply the elimination of paper questionnaires nor the implementation of computer assisted paperless interviewing (CAPI) techniques (see Footnote 8). Rather, data were collected on paper questionnaires and were immediately entered by the interviewers themselves using laptops and a well-developed data entry program with a set of built-in consistency checks whose purpose is to alert the interviewer of possible mistakes while typing or while recording responses on the questionnaire. Thus, the quality of the data could then be checked by the program while the interviewers were still in the field and the identified inconsistencies could be solved by direct verification with the households, which was facilitated by the scheme of multiple visits. Finally, once checked, the data entered in the field was automatically transferred to the survey central team via the internet. Data were subjected to five kinds of checks while being entered: range checks, skip checks, consistency checks, checks against reference data and typographic checks:

- *Range checks* are intended to ensure that every variable in the survey contains only data within a limited domain of valid values. Categorical variables should take on only defined values. For example, for the variable "q13.01 Type of dwelling" the only acceptable codes should be "1" to "5". Any other value is flagged as an error. Chronological variables should contain valid dates and numeric variables are verified to lie within prescribed minimum and maximum values. It is generally convenient to detect and correct range errors at the time of data entry because range errors are often a result of the data entry operation itself rather than mistakes made at the time of the interview. If the error is merely typographical, the interviewers who enters the data can correct it immediately. However, the data entry program allows the operator to enter an out-of-range value if it correctly reflects what has been observed and was not due to a typographical error. In that case, a written error report is generated so that the supervisor and interviewer can verify the value in a re-visit to the household.

In modules 14B, 14C and 14D (non-food expenditures) range checks are specific to each item (e.g., the range of acceptable values for electricity is different from that of cigarettes). In Module 14A, the data entry program also controls the consistency between amounts and quantities against a table of implicit unit values.

- *Skip checks* verify whether the interviewer correctly followed the instructions in the questionnaire to skip certain questions depending on the characteristics of the respondent. For example, a simple check verifies that questions to be asked only of schoolchildren are not recorded for a child who answered "No" to an initial question on school enrolment. A more complicated check verifies that the right modules of the questionnaire have been filled in for each respondent. Depending on his

or her age and gender, each member of the household is supposed to answer (or skip) specific sections of the questionnaire. For instance, children less than 15 years of age should be asked about health, but questions about employment should not be asked to them.

- *Consistency checks* verify that values from one question are consistent with values from another question. A simple check occurs when both values are from the same statistical unit, for example the date of birth and age of a given individual. Furthermore, more complicated consistency checks involve comparing information from two or more different observation units. For instance, in order to check the demographic consistency of the household, consistency between the ages and genders of all household members is checked with a view to kinship relationships. Hence, parents should be at least (say) 15 years older than their children, etc.
- *Checks against reference tables.* In order to check the consistency of anthropometric data the recorded values for height, weight and age are checked against the World Health Organization's standard reference tables. Any value for the standard indicators (height-for-age, weight-for-age and weight-for-height) that falls beyond three standard deviations from the norm is flagged as a *possible* error so that the measurement can be repeated.
- *Typographic errors* in the inputting of monetary amounts are checked against page and column control totals in many of the modules – especially in modules 11, 12 and 14.<sup>8</sup>

### ***Central monitoring of fieldwork quality indicators (paradata analysis)***

Central monitoring of fieldwork quality indicators – often referred to as *paradata* analysis – was implemented by the survey central team at headquarters over the data received from the field. On top of the computer quality checks, which focus on each specific interview, it is also necessary to monitor the overall work being done by all the interviewers together. To this purpose, the whole package of information being received from the field was processed centrally and the quality of the work being done was assessed on a continuous basis by comparing the data from the various interviewers<sup>9</sup>. The survey central team continuously analyzed a set of over 30 quality indicators and decided whether special supervision was needed on any particular interviewer whose work appeared to be inadequate, or whether new and more precise instructions should be issued. Thus, the monitoring of the indicators provided early warnings and the necessary corrective actions were carried out in a timely manner. As an example, three indicators and their trend over the first 21 fortnights are described below:

- *Household size (overall and by interviewer).* In some surveys, certain interviewers tend to omit household members and record smaller households throughout the fieldwork period, especially in its later stages. The table and chart below shows the average household size by interviewer and its evolution throughout the BSLC fieldwork.

<sup>8</sup> The control of typographic errors is fundamental in surveys that report amounts, and the main reason for **not** resorting to paperless interviewing (CAPI) techniques for the BSLC. Decades of experience with similar surveys have shown that, in the absence of such checks, the incidence of those errors becomes unacceptable. The BSLC reports hundreds of monetary amounts for each household, and dozens of them would have been wrong. Checking the inputted amounts against control totals is a very effective way of detecting and correcting typographic errors, but this can only be done if the figures (and the control totals) are first recorded on paper, and then inputted. CAPI techniques may be valuable for other kinds of surveys, but not yet for living standards or household budget surveys.

<sup>9</sup> The comparison among interviewers was facilitated by the random allocation of PSUs among interviewers every fortnight and by the interpenetrating sampling design.

BSLC 2016/17. AVERAGE HOUSEHOLD SIZE BY INTERVIEWER AND FORTNIGHT

Average Hous																						Total

- Number of transactions recorded in the Consumption and Expenses module (overall and by interviewer). Some interviewers may undercount the expenditures on food and non-food items in order to reduce the work burden when asking about the quantities purchased and the amounts spent for each product. In some surveys this behavior usually tends to strengthen as fieldwork moves forward and, hence, the number of recorded transactions tend to decrease over time. The following two tables and charts describe the evolution of the household average number of food and non-food items recorded by the BSLC.

BSLC 2016/17. AVERAGE NUMBER OF FOOD ITEMS CONSUMED PER HOUSEHOLD, BY INTERVIEWER AND FORTNIGHT

Average of items	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	Total

***Fieldwork supervision***

On-site fieldwork supervision via check-up interviews is an essential duty of the supervisors that can be neither fulfilled by a computer nor through the visual scrutiny of the questionnaire. It consists in verifying that interviewers have applied the different modules to the adequate respondents and that they have recorded the answers properly. This was achieved by having the supervisors re-visit a subsample of the interviewed households and re-ask some of the questions. The households to be re-visited were randomly selected, with a focus on certain interviewers based on the results obtained from the central monitoring of the quality indicators. Thus, this procedure helped maintain high standards among the interviewers and flag up any unsatisfactory interviewers. A preference was given to those questions that had greater incentives to be answered in a particular way. For example, the interviewer may record an answer deliberately wrong in order to skip other questions and thus shorten the interview. This is the case of questions like the one that asks whether the respondent ever attended any vocational training; if the recorded answer is “Yes” then a set of questions will have to be asked about the respondent’s training, but if the recorded answer is “No”, that set of questions will have to be skipped. Thus, this kind of questions may generate incentives that can lead the interviewer to recording an answer different from the one actually given by the respondent.

The appendixes that follow present the BSLC questionnaire, a codebook with the organization and content of the BSLC database, the list of special codes used by the survey and a guide to the computation of estimates and sampling errors.

## Appendix 1

### BSLC questionnaire

This appendix presents all pages of the BSLC questionnaire, reproduced at approximately 60 percent of their actual size, with the answer fields in yellow.

#### Cover page

Country Assessment of Living Conditions

### Barbados Survey of Living Conditions 2016

#### Identification

ED	Household number	Extra
		This extra digit should almost always be 1. It may exceptionally be used to tell apart two households with the same serial number.

## Module 13 – Housing

## ≤ ≥ MODULE 13: Housing

13.00 Respondent ID code for this Module

13.01 What type of dwelling is this?

House	1	Group dwelling	4
Flat/ Apartment	2	Other (specify)	5
Part of Commercial building	3		

13.02 Which of the following categories indicates your ownership of this dwelling? RO

Owned (with mortgage)	1	Gov't rented/ leased dwelling	5
Owned (without mortgage)	2	Squatted	6
Rented room in larger dwelling	3	Rent-free	7
Private rented/ leased dwelling	4	Other (specify)	8

13.03 Which of the following categories indicates your ownership of the land on which this dwelling stands? RO

Owned (with mortgage)	1	Gov't rented/ Leased	4
Owned (without mortgage)	2	Squatted	5
Private rented/ Leased	3	Rent-free	6
		Other (specify)	7

13.04 In what year was the dwelling built? (Refers to original structure)

13.05 Have major renovations been undertaken to the dwelling since it was built?

Yes	1
No	2

13.06 What kind of renovations?

13.07 In what year were the latest renovations done?

13.08 What is the main construction material of the outer walls of the dwelling?

Masonry	1	Mix of cement board and wood/masonry	5
Wood	2	Plywood	6
Mix of wood and masonry	3	Makeshift	7
Cement board	4	Other (specify)	8

13.09 How is the foundation of the dwelling constructed? RO

Fully enclosed masonry	1
Pillars or columns	2
Loose rock	3

13.10 What is the main material used for flooring the dwelling?

Masonry	1	Combination of any	4
Wood	2	of the previous	5
Cement board	3	Other	

13.11 What is the main material used for roofing the dwelling?

Metal (Corrugated metal sheets)	1	Roofing shingles	4
Ceramic/ PVC / Clay tiles	2	Other corrugated sheets	5
Cement	3	Other (specify)	6

13.12 Does this dwelling have any of the following security devices? (Check ☐ all that applies)

13.12a Security camera	<input type="checkbox"/>
13.12b Security lighting	<input type="checkbox"/>
13.12c Perimeter fencing	<input type="checkbox"/>
13.12d Security bars on ALL windows	<input type="checkbox"/>
13.12e Security bars on SOME windows	<input type="checkbox"/>
13.12f House alarm	<input type="checkbox"/>
13.12g Smoke detectors	<input type="checkbox"/>

## ≤ ≥ MODULE 13: Housing

13.13 What type of fuel does this household use most for cooking? RO

Natural gas	1	Kerosene	5
LPG (bottled gas)	2	Solar	6
Electricity	3	Other (specify)	7
Wood/Charcoal	4		

13.14 What is the main type of toilet facilities used by this household? RO

13.14a WC (flush toilet linked to sewer)	1
13.14b WC (flush toilet linked to septic tank)	2
13.14c WC (flush toilet linked to well)	3
13.14d WC (flush toilet linked to private treatment facility)	4
13.14e Pit - latrine	5
13.14f Other (specify)	6

13.15 What is the main source of water supply used by this household? RO

Piped into dwelling	1	Well/Tank	4
Piped into yard	2	Other (specify)	5
Public standpipe	3		

13.16 What is the main type of lighting used by this household? RO

Gas	1	Batteries	4
Kerosene	2	Other (specify)	5
Electricity	3		

13.17 How many rooms does the dwelling contain? (Do not count bathrooms, kitchens, laundry rooms, balcony, attic, corridor)

13.18 How many of the rooms in the dwelling are used solely by this household?

13.19 How many of the rooms in the dwelling are used solely as bedrooms for members of this household?

13.20 How many of the rooms in the dwelling are rented or sublet to people who are not part of this household?

13.21 How many of the rooms in the dwelling are vacant?

13.22 Indicate how many of the following items are owned by members of this household? Write '0' where there is none

13.22a Stove	<input type="checkbox"/>
13.22b Deep freeze	<input type="checkbox"/>
13.22c Microwave	<input type="checkbox"/>
13.22d Refrigerator	<input type="checkbox"/>
13.22e Washing machine	<input type="checkbox"/>
13.22f Clothes dryer	<input type="checkbox"/>
13.22g Dish washer	<input type="checkbox"/>
13.22h Water tank	<input type="checkbox"/>
13.22i Solar water heater	<input type="checkbox"/>
13.22j Cable TV/ satellite TV	<input type="checkbox"/>
13.22k Fixed line telephone	<input type="checkbox"/>
13.22l Cell phone	<input type="checkbox"/>
13.22m Computer (laptop/ desktop)	<input type="checkbox"/>
13.22n Android box	<input type="checkbox"/>
13.22o Game console	<input type="checkbox"/>
13.22p Air Conditioner	<input type="checkbox"/>
13.22q Automobile	<input type="checkbox"/>

13.23 In the event of a severe natural disaster, where would this household go for shelter? RO

This dwelling	1	Friend	4
Hurricane shelter	2	Other (specify)	5
Relatives	3

03								

The page shown above is the back page of the questionnaire. The interviewer transferred the names and ages of all household members from the roster to the flap on its left-hand side. The flap could be deployed to have the list of all members visible at all times.

## Appendix 2

### BSLC codebook

This appendix presents the contents of the 11 files that constitute the BSLC database, with the name, the label and the kind of values contained in each variable.

The names of most variables are simple variations of their question codes on the questionnaire (e.g., variable `q13_01`, labeled “Type of dwelling”, in the database file RT001, contains the answers to question 13.01, “What type of **dwelling** is this”, in Module 13.)

Column “Values” contain the encoding used for categorical variables, or a reference to the special codes reproduced in *Appendix 3*. For numerical variables, the column contains the range of acceptable values considered by the data entry program. The conventional caption “Dummy” flags the variables where the interviewer was instructed to eventually check a box on the questionnaire; these variables contain a “1” if the box was checked ☒, or a blank if it was not checked ☐.

The codebook below contains all of the variables in the “Full” version of the dataset files. The variables in *italics* are excluded from the “Public” version of the files.

id	Member ID Code	Numbers 1 to 12
perexpco	Personal expense code	PEREXP codes
q11_01y	Yes, spent in the past 7 days	Dummy
q11_02	Amount spent BDS\$	Numbers 0.1 to 999.99
q11_01n	Item name (if Other)	String
respid	Respondent ID Code	Numbers 1 to 12

**Database files RT121, RT122, RT123, RT124, RT125 and RT126 (Farming)**

Database file RT121 – Crops		
Name	Label	Values
hhid	Household Identifier	Number
weight	Sampling weight (final weight)	Number
psu	Primary Sampling Unit (Enumeration District)	Number
stratum	Sampling Stratum	Numbers 1 to 11
psus_N	Number of PSUs in the stratum	Number
cropcode	Crop Code	CROP codes
q12_07y	Yes, crop cultivated	Dummy
q12_08	Acres cultivated	Numbers 0 to 999.99
q12_09	Pounds produced	Numbers 0 to 99999
q12_10a	Pounds sold	Numbers 0 to 99999
q12_10b	Amount sold BDS	Numbers 0 to 99999.99
q12_07n	Crop name (if Other)	String

Database file RT122 – Animals		
Name	Label	Values
hhid	Household Identifier	Number
weight	Sampling weight (final weight)	Number
psu	Primary Sampling Unit (Enumeration District)	Number
stratum	Sampling Stratum	Numbers 1 to 11
psus_N	Number of PSUs in the stratum	Number
animalcode	Animal Code	ANIMAL codes
q12_12	Yes, animal raised	Dummy
q12_13a	# Animals owned	Numbers 1 to 999
q12_13b	Value of animals owned (BDS)	Numbers 100 to 99999.99
q12_14	# Animals born (12m)	Numbers 0 to 999
q12_15a	# Animals purchased (12m)	Numbers 0 to 999
q12_15b	Value of animals purchased (BDS)	Numbers 0 to 9999.99
q12_16	# Animals died (12m)	Numbers 0 to 999
q12_17a	# Animals sold (12m)	Numbers 0 to 999
q12_17b	Value of animals sold (BDS)	Numbers 0 to 99999.99
q12_12n	Animal name of the species (if Other)	String

Database file RT123 – Agricultural by-products		
Name	Label	Values
hhid	Household Identifier	Number
weight	Sampling weight (final weight)	Number
psu	Primary Sampling Unit (Enumeration District)	Number
stratum	Sampling Stratum	Numbers 1 to 11
psus_N	Number of PSUs in the stratum	Number
byproductcode	By-product Code	BYPRODUCT codes
q12_19y	Yes, by-product produced	Dummy
q12_20	Amount sold (BDS)	Numbers 99.99 to 99999.99
q12_19n	By-product name (if Other)	String

Database file RT124 – Fishing		
Name	Label	Values
hhid	Household Identifier	Number
weight	Sampling weight (final weight)	Number
Psu	Primary Sampling Unit (Enumeration District)	Number
stratum	Sampling Stratum	Numbers 1 to 11
psus_N	Number of PSUs in the stratum	Number
fishingcode	Fishing activity Code	FISHING codes
q12_22y	Yes, engaged in fishing activity	Dummy
q12_23	Amount sold 12m (BDS)	Numbers 99.99 to 99999.99
q12_22n	Name of the fishing activity (if Other)	String

Database file RT125 – Agricultural inputs		
Name	Label	Values
hhid	Household Identifier	Number
weight	Sampling weight (final weight)	Number
Psu	Primary Sampling Unit (Enumeration District)	Number
stratum	Sampling Stratum	Numbers 1 to 11
psus_N	Number of PSUs in the stratum	Number
inputcode	Agricultural Input Code	INPUT codes
q12_25y	Yes, spent on input	Dummy
q12_26	Amount spent 12m (BDS)	Numbers 99.99 to 99999.99
q12_25n	Name of input (if Other)	String

Database file RT126 – Agricultural assets		
Name	Label	Values
hhid	Household Identifier	Number
weight	Sampling weight (final weight)	Number
Psu	Primary Sampling Unit (Enumeration District)	Number
stratum	Sampling Stratum	Numbers 1 to 11
psus_N	Number of PSUs in the stratum	Number
assetcode	Agricultural asset Code	ASSET codes
q12_27y	Yes, owns the asset	Dummy
q12_28a	# of assets owned	Numbers 1 to 99
q12_28b	Amount of assets owned (BDS)	Numbers 99.99 to 99999.99
q12_29a	# of assets bought	Numbers 0 to 99
q12_29b	Amount of assets bought (BDS)	Numbers 0 to 99999.99
q12_30a	# of assets sold	Numbers 0 to 99
q12_30b	Amount of assets sold (BDS)	Numbers 0 to 99999.99
q12_31	Amount of assets rented (BDS)	Numbers 0 to 99999.99
q12_27n	Name of asset (if Other)	String

**Database file RT140 – Food consumption**

Database file RT140 – Food consumption		
Name	Label	Values
hhid	Household Identifier	Number
weight	Sampling weight (final weight)	Number
Psu	Primary Sampling Unit (Enumeration District)	Number
stratum	Sampling Stratum	Numbers 1 to 11
psus_N	Number of PSUs in the stratum	Number
foodcode	Food Code	FOOD codes
anncoeff	Annualization coefficient	Number
quantity	Quantity (in gr or ml)	Number
q14_02	Buy every __ days	Numbers 1 to 99
amount	Amount spent last time BDS\$	Number
q14_03a	Units bought last time	Numbers 1 to 999
q14_03b	Weight/Volume of each unit bought	Numbers -9999.999 to 99999.999
q14_03c	Measuring Unit of food bought	[1: Gram; 2: Kilo; 3: Ounce; 4: Pound; 5: Ml / CC; 6: Liter; 7: Fluid Ounce; 8: Quart]
q14_04a	Self-produced	Dummy
q14_04b	Self-supplied	Dummy
q14_04c	Gift from another household	Dummy
q14_04d	Received from the government	Dummy
q14_04e	Received from church	Dummy
q14_04f	Received as payment in kind	Dummy
q14_04g	Received from another source	Dummy
q14_05a	Units not bought and consumed in the past 7 days	Numbers 1 to 100
q14_05b	Weight/Volume of each unit not bought and consumed in the past 7 days	Numbers 0.001 to 999.999
q14_05c	Measuring Unit of food not bought and consumed in the past 7 days	[1: Gram; 2: Kilo; 3: Ounce; 4: Pound; 5: Ml / CC; 6: Liter; 7: Fluid Ounce; 8: Quart]
q14_01n	Product name (if n.e.s.)	String

**Database file RT141 – Non-food expenses**

Database file RT141 – Non-food expenses		
Name	Label	Values
hhid	Household Identifier	Number
weight	Sampling weight (final weight)	Number
psu	Primary Sampling Unit (Enumeration District)	Number
stratum	Sampling Stratum	Numbers 1 to 11
psus_N	Number of PSUs in the stratum	Number
nonfoodcode	Item Code	NONFOOD codes
anncoeff	Annualization coefficient	Number
amount	Amount spent BDS\$	Numbers -99999.99 to 999999.99
q14_1n	Item name (if Other)	String

## Appendix 3

### BSLC special codes

#### *International Standard Industrial Classification (ISIC)*

International Standard Industrial Classification (ISIC)	
Code	Description
0114	Growing of sugar cane
0115	Growing of tobacco
0116	Growing of fiber crops
0119	Growing of other non-perennial crops
0121	Growing of grapes
0122	Growing of tropical and subtropical fruits
0123	Growing of citrus fruits
0124	Growing of pome fruits and stone fruits
0125	Growing of other tree and bush fruits and nuts
0126	Growing of oleaginous fruits
0127	Growing of beverage crops
0128	Growing of spices, aromatic, drug and pharmaceutical crops
0129	Growing of other perennial crops
0130	Plant propagation
0141	Raising of cattle and buffaloes
0142	Raising of horses and other equines
0143	Raising of camels and camelids
0144	Raising of sheep and goats
0145	Raising of swine/pigs
0146	Raising of poultry
0149	Raising of other animals
0150	Mixed farming
0161	Support activities for crop production
0162	Support activities for animal production
0163	Post-harvest crop activities
0164	Seed processing for propagation
0170	Hunting, trapping and related service activities
0210	Sylviculture and other forestry activities
0220	Logging
0230	Gathering of non-wood forest products
0240	Support services to forestry
0311	Marine fishing
0312	Freshwater fishing
0321	Marine aquaculture
0322	Freshwater aquaculture
0510	Mining of hard coal
0520	Mining of lignite
0610	Extraction of crude petroleum
0620	Extraction of natural gas
0710	Mining of iron ores
0721	Mining of uranium and thorium ores
0729	Mining of other non-ferrous metal ores
0810	Quarrying of stone, sand and clay
0891	Mining of chemical and fertilizer minerals
0892	Extraction of peat
0893	Extraction of salt
0899	Other mining and quarrying n.e.c.
0910	Support activities for petroleum and natural gas extraction
0990	Support activities for other mining and quarrying
1010	Processing and preserving of meat
1020	Processing and preserving of fish, crustaceans and mollusks

International Standard Industrial Classification (ISIC)	
Code	Description
1030	Processing and preserving of fruit and vegetables
1040	Manufacture of vegetable and animal oils and fats
1050	Manufacture of dairy products
1061	Manufacture of grain mill products
1062	Manufacture of starches and starch products
1071	Manufacture of bakery products
1072	Manufacture of sugar
1073	Manufacture of cocoa, chocolate and sugar confectionery
1074	Manufacture of macaroni, noodles, couscous and similar farinaceous products
1075	Manufacture of prepared meals and dishes
1079	Manufacture of other food products n.e.c.
1080	Manufacture of prepared animal feeds
1101	Distilling, rectifying and blending of spirits
1102	Manufacture of wines
1103	Manufacture of malt liquors and malt
1104	Manufacture of soft drinks; production of mineral waters and other bottled waters
1200	Manufacture of tobacco products
1311	Preparation and spinning of textile fibers
1312	Weaving of textiles
1313	Finishing of textiles
1391	Manufacture of knitted and crocheted fabrics
1392	Manufacture of made-up textile articles, except apparel
1393	Manufacture of carpets and rugs
1394	Manufacture of cordage, rope, twine and netting
1399	Manufacture of other textiles n.e.c.
1410	Manufacture of wearing apparel, except fur apparel
1420	Manufacture of articles of fur
1430	Manufacture of knitted and crocheted apparel
1511	Tanning and dressing of leather; dressing and dyeing of fur
1512	Manufacture of luggage, handbags and the like, saddlery and harness
1520	Manufacture of footwear
1610	Sawmilling and planing of wood
1621	Manufacture of veneer sheets and wood-based panels
1622	Manufacture of builders' carpentry and joinery
1623	Manufacture of wooden containers
1629	Manufacture of other products of wood; manufacture of articles of cork, straw and plaiting materials
1701	Manufacture of pulp, paper and paperboard
1702	Manufacture of corrugated paper and paperboard and of containers of paper and paperboard
1709	Manufacture of other articles of paper and paperboard
1811	Printing
1812	Service activities related to printing
1820	Reproduction of recorded media
1910	Manufacture of coke oven products
1920	Manufacture of refined petroleum products
2011	Manufacture of basic chemicals
2012	Manufacture of fertilizers and nitrogen compounds
2013	Manufacture of plastics and synthetic rubber in primary forms
2021	Manufacture of pesticides and other agrochemical products
2022	Manufacture of paints, varnishes and similar coatings, printing ink and mastics
2023	Manufacture of soap and detergents, cleaning and polishing preparations, perfumes and toilet preparations
2029	Manufacture of other chemical products n.e.c.
2030	Manufacture of man-made fibers
2100	Manufacture of pharmaceuticals, medicinal chemical and botanical products
2211	Manufacture of rubber tires and tubes; retreading and rebuilding of rubber tires
2219	Manufacture of other rubber products
2220	Manufacture of plastics products
2310	Manufacture of glass and glass products
2391	Manufacture of refractory products
2392	Manufacture of clay building materials
2393	Manufacture of other porcelain and ceramic products
2394	Manufacture of cement, lime and plaster

International Standard Industrial Classification (ISIC)	
Code	Description
2395	Manufacture of articles of concrete, cement and plaster
2396	Cutting, shaping and finishing of stone
2399	Manufacture of other non-metallic mineral products n.e.c.
2410	Manufacture of basic iron and steel
2420	Manufacture of basic precious and other non-ferrous metals
2431	Casting of iron and steel
2432	Casting of non-ferrous metals
2511	Manufacture of structural metal products
2512	Manufacture of tanks, reservoirs and containers of metal
2513	Manufacture of steam generators, except central heating hot water boilers
2520	Manufacture of weapons and ammunition
2591	Forging, pressing, stamping and roll-forming of metal; powder metallurgy
2592	Treatment and coating of metals; machining
2593	Manufacture of cutlery, hand tools and general hardware
2599	Manufacture of other fabricated metal products n.e.c.
2610	Manufacture of electronic components and boards
2620	Manufacture of computers and peripheral equipment
2630	Manufacture of communication equipment
2640	Manufacture of consumer electronics
2651	Manufacture of measuring, testing, navigating and control equipment
2652	Manufacture of watches and clocks
2660	Manufacture of irradiation, electromedical and electrotherapeutic equipment
2670	Manufacture of optical instruments and photographic equipment
2680	Manufacture of magnetic and optical media
2710	Manufacture of electric motors, generators, transformers and electricity distribution and control apparatus
2720	Manufacture of batteries and accumulators
2731	Manufacture of fiber optic cables
2732	Manufacture of other electronic and electric wires and cables
2733	Manufacture of wiring devices
2740	Manufacture of electric lighting equipment
2750	Manufacture of domestic appliances
2790	Manufacture of other electrical equipment
2811	Manufacture of engines and turbines, except aircraft, vehicle and cycle engines
2812	Manufacture of fluid power equipment
2813	Manufacture of other pumps, compressors, taps and valves
2814	Manufacture of bearings, gears, gearing and driving elements
2815	Manufacture of ovens, furnaces and furnace burners
2816	Manufacture of lifting and handling equipment
2817	Manufacture of office machinery and equipment (except computers and peripheral equipment)
2818	Manufacture of power-driven hand tools
2819	Manufacture of other general-purpose machinery
2821	Manufacture of agricultural and forestry machinery
2822	Manufacture of metal-forming machinery and machine tools
2823	Manufacture of machinery for metallurgy
2824	Manufacture of machinery for mining, quarrying and construction
2825	Manufacture of machinery for food, beverage and tobacco processing
2826	Manufacture of machinery for textile, apparel and leather production
2829	Manufacture of other special-purpose machinery
2910	Manufacture of motor vehicles
2920	Manufacture of bodies (coachwork) for motor vehicles; manufacture of trailers and semi-trailers
2930	Manufacture of parts and accessories for motor vehicles
3011	Building of ships and floating structures
3012	Building of pleasure and sporting boats
3020	Manufacture of railway locomotives and rolling stock
3030	Manufacture of air and spacecraft and related machinery
3040	Manufacture of military fighting vehicles
3091	Manufacture of motorcycles
3092	Manufacture of bicycles and invalid carriages
3099	Manufacture of other transport equipment n.e.c.
3100	Manufacture of furniture
3211	Manufacture of jeweler and related articles

International Standard Industrial Classification (ISIC)	
Code	Description
3212	Manufacture of imitation jeweler and related articles
3220	Manufacture of musical instruments
3230	Manufacture of sports goods
3240	Manufacture of games and toys
3250	Manufacture of medical and dental instruments and supplies
3290	Other manufacturing n.e.c.
3311	Repair of fabricated metal products
3312	Repair of machinery
3313	Repair of electronic and optical equipment
3314	Repair of electrical equipment
3315	Repair of transport equipment, except motor vehicles
3319	Repair of other equipment
3320	Installation of industrial machinery and equipment
3510	Electric power generation, transmission and distribution
3520	Manufacture of gas; distribution of gaseous fuels through mains
3530	Steam and air conditioning supply
3600	Water collection, treatment and supply
3700	Sewerage
3811	Collection of non-hazardous waste
3812	Collection of hazardous waste
3821	Treatment and disposal of non-hazardous waste
3822	Treatment and disposal of hazardous waste
3830	Materials recovery
3900	Remediation activities and other waste management services
4100	Construction of buildings
4210	Construction of roads and railways
4220	Construction of utility projects
4290	Construction of other civil engineering projects
4311	Demolition
4312	Site preparation
4321	Electrical installation
4322	Plumbing, heat and air-conditioning installation
4329	Other construction installation
4330	Building completion and finishing
4390	Other specialized construction activities
4510	Sale of motor vehicles
4520	Maintenance and repair of motor vehicles
4530	Sale of motor vehicle parts and accessories
4540	Sale, maintenance and repair of motorcycles and related parts and accessories
4610	Wholesale on a fee or contract basis
4620	Wholesale of agricultural raw materials and live animals
4630	Wholesale of food, beverages and tobacco
4641	Wholesale of textiles, clothing and footwear
4649	Wholesale of other household goods
4651	Wholesale of computers, computer peripheral equipment and software
4652	Wholesale of electronic and telecommunications equipment and parts
4653	Wholesale of agricultural machinery, equipment and supplies
4659	Wholesale of other machinery and equipment
4661	Wholesale of solid, liquid and gaseous fuels and related products
4662	Wholesale of metals and metal ores
4663	Wholesale of construction materials, hardware, plumbing and heating equipment and supplies
4669	Wholesale of waste and scrap and other products n.e.c.
4690	Non-specialized wholesale trade
4711	Retail sale in non-specialized stores with food, beverages or tobacco predominating
4719	Other retail sale in non-specialized stores
4721	Retail sale of food in specialized stores
4722	Retail sale of beverages in specialized stores
4723	Retail sale of tobacco products in specialized stores
4730	Retail sale of automotive fuel in specialized stores
4741	Retail sale of computers, peripheral units, software and telecommunications equipment in specialized stores
4742	Retail sale of audio and video equipment in specialized stores

International Standard Industrial Classification (ISIC)	
Code	Description
4751	Retail sale of textiles in specialized stores
4752	Retail sale of hardware, paints and glass in specialized stores
4753	Retail sale of carpets, rugs, wall and floor coverings in specialized stores
4759	Retail sale of electrical household appliances, furniture, lighting equipment and other household articles in specialized stores
4761	Retail sale of books, newspapers and stationary in specialized stores
4762	Retail sale of music and video recordings in specialized stores
4763	Retail sale of sporting equipment in specialized stores
4764	Retail sale of games and toys in specialized stores
4771	Retail sale of clothing, footwear and leather articles in specialized stores
4772	Retail sale of pharmaceutical and medical goods, cosmetic and toilet articles in specialized stores
4773	Other retail sale of new goods in specialized stores
4774	Retail sale of second-hand goods
4781	Retail sale via stalls and markets of food, beverages and tobacco products
4782	Retail sale via stalls and markets of textiles, clothing and footwear
4789	Retail sale via stalls and markets of other goods
4791	Retail sale via mail order houses or via Internet
4799	Other retail sale not in stores, stalls or markets
4911	Passenger rail transport, interurban
4912	Freight rail transport
4921	Urban and suburban passenger land transport
4922	Other passenger land transport
4923	Freight transport by road
4930	Transport via pipeline
5011	Sea and coastal passenger water transport
5012	Sea and coastal freight water transport
5021	Inland passenger water transport
5022	Inland freight water transport
5110	Passenger air transport
5120	Freight air transport
5210	Warehousing and storage
5221	Service activities incidental to land transportation
5222	Service activities incidental to water transportation
5223	Service activities incidental to air transportation
5224	Cargo handling
5229	Other transportation support activities
5310	Postal activities
5320	Courier activities
5510	Short term accommodation activities
5520	Camping grounds, recreational vehicle parks and trailer parks
5590	Other accommodation
5610	Restaurants and mobile food service activities
5621	Event catering
5629	Other food service activities
5630	Beverage serving activities
5811	Book publishing
5812	Publishing of directories and mailing lists
5813	Publishing of newspapers, journals and periodicals
5819	Other publishing activities
5820	Software publishing
5911	Motion picture, video and television programme production activities
5912	Motion picture, video and television programme post-production activities
5913	Motion picture, video and television programme distribution activities
5914	Motion picture projection activities
5920	Sound recording and music publishing activities
6010	Radio broadcasting
6020	Television programming and broadcasting activities
6110	Wired telecommunications activities
6120	Wireless telecommunications activities
6130	Satellite telecommunications activities
6190	Other telecommunications activities
6201	Computer programming activities

International Standard Industrial Classification (ISIC)	
Code	Description
6202	Computer consultancy and computer facilities management activities
6209	Other information technology and computer service activities
6311	Data processing, hosting and related activities
6312	Web portals
6391	News agency activities
6399	Other information service activities n.e.c.
6411	Central banking
6419	Other monetary intermediation
6420	Activities of holding companies
6430	Trusts, funds and similar financial entities
6491	Financial leasing
6492	Other credit granting
6499	Other financial service activities, except insurance and pension funding activities, n.e.c.
6511	Life insurance
6512	Non-life insurance
6520	Reinsurance
6530	Pension funding
6611	Administration of financial markets
6612	Security and commodity contracts brokerage
6619	Other activities auxiliary to financial service activities
6621	Risk and damage evaluation
6622	Activities of insurance agents and brokers
6629	Other activities auxiliary to insurance and pension funding
6630	Fund management activities
6810	Real estate activities with own or leased property
6820	Real estate activities on a fee or contract basis
6910	Legal activities
6920	Accounting, bookkeeping and auditing activities; tax consultancy
7010	Activities of head offices
7020	Management consultancy activities
7110	Architectural and engineering activities and related technical consultancy
7120	Technical testing and analysis
7210	Research and experimental development on natural sciences and engineering
7220	Research and experimental development on social sciences and humanities
7310	Advertising
7320	Market research and public opinion polling
7410	Specialized design activities
7420	Photographic activities
7490	Other professional, scientific and technical activities n.e.c.
7500	Veterinary activities
7710	Renting and leasing of motor vehicles
7721	Renting and leasing of recreational and sports goods
7722	Renting of video tapes and disks
7729	Renting and leasing of other personal and household goods
7730	Renting and leasing of other machinery, equipment and tangible goods
7740	Leasing of intellectual property and similar products, except copyrighted works
7810	Activities of employment placement agencies
7820	Temporary employment agency activities
7830	Other human resources provision
7911	Travel agency activities
7912	Tour operator activities
7990	Other reservation service and related activities
8010	Private security activities
8020	Security systems service activities
8030	Investigation activities
8110	Combined facilities support activities
8121	General cleaning of buildings
8129	Other building and industrial cleaning activities
8130	Landscape care and maintenance service activities
8211	Combined office administrative service activities
8219	Photocopying, document preparation and other specialized office support activities

International Standard Industrial Classification (ISIC)	
Code	Description
8220	Activities of call centres
8230	Organization of conventions and trade shows
8291	Activities of collection agencies and credit bureaus
8292	Packaging activities
8299	Other business support service activities n.e.c.
8411	General public administration activities
8412	Regulation of the activities of providing health care, education, cultural services and other social services, excluding social security
8413	Regulation of and contribution to more efficient operation of businesses
8421	Foreign affairs
8422	Defense activities
8423	Public order and safety activities
8430	Compulsory social security activities
8510	Pre-primary and primary education
8521	General secondary education
8522	Technical and vocational secondary education
8530	Higher education
8541	Sports and recreation education
8542	Cultural education
8549	Other education n.e.c.
8550	Educational support activities
8610	Hospital activities
8620	Medical and dental practice activities
8690	Other human health activities
8710	Residential nursing care facilities
8720	Residential care activities for mental retardation, mental health and substance abuse
8730	Residential care activities for the elderly and disabled
8790	Other residential care activities
8810	Social work activities without accommodation for the elderly and disabled
8890	Other social work activities without accommodation
9000	Creative, arts and entertainment activities
9101	Library and archives activities
9102	Museums activities and operation of historical sites and buildings
9103	Botanical and zoological gardens and nature reserves activities
9200	Gambling and betting activities
9311	Operation of sports facilities
9312	Activities of sports clubs
9319	Other sports activities
9321	Activities of amusement parks and theme parks
9329	Other amusement and recreation activities n.e.c.
9411	Activities of business and employers' membership organizations
9412	Activities of professional membership organizations
9420	Activities of trade unions

## Appendix 4

### Stata syntax for weighted estimates and sampling error computation

This annex provides a set of examples of the STATA syntax for computing estimates and the corresponding sampling errors, which account for the full BSLC complex sample features (stratification, clustering and weighting due to differential inclusion probabilities and nonresponse adjustments). For more details, data users are referred to the online STATA manual for the svy command (<http://www.stata.com/manuals14/svy.pdf>).

**To specify the BSLC sample design features** in any of the dataset files, use the command:

```
svyset psu [pweight=weight], strata (stratum) vce(linearized) fpc(psus_N) || hhid
```

The specification is saved with the file, so it only needs to be done once.

**To estimate the overall mean age of household members** in dataset file RT002, use the command:

```
svy: mean q1_04
```

**To estimate the overall mean age by gender**, use the command:

```
svy: mean q1_04, over(q1_03)
```

**To estimate the mean age of household heads**, use the command:

```
svy, subpop (if q1_02==1): mean q1_04
```

**To estimate the frequency distribution of birthplace**, use the command:

```
svy: tab q2_01, se ci
```

**To estimate the frequency distribution of birthplace by gender**, use the command:

```
svy: tab q2_01 q1_03, col se ci
```

**To estimate the frequency distribution of birthplace of household heads**, use the command:

```
svy, subpop (if q1_02==1): tab q2_01, se ci
```

**To estimate the regression coefficients** of a continuous variable  $y$  on two continuous variables  $x_1$  and  $x_2$ , use the command:

```
svy: regress y x1 x2
```

**To estimate the regression coefficients** of a continuous variable  $y$  on two continuous variables  $x_1$  and  $x_2$  and two categorical variables  $x_3$  and  $x_4$ , use the command:

```
xi: svy: regress y x1 x2 i.x3 i.x4
```

**To estimate the Gini coefficient of variable  $y$** , install the `svylorenz` Stata command and use the syntax:

```
svylorenz y, ngp(5)
```
